

# **Providence Solutions Partners With MaxVec For Selected Malaysia Government Opportunities**

*Alliance Demonstrates Demand for High-Availability, Fault-tolerance and Disaster-Recovery in the Malaysia Government Sector*

Providence Solutions, through its office in Malaysia at Merchant Square in Petaling Jaya, is pleased to announce its partnership with MaxVec Sdn. Bhd. as its representative for selected defense and other government customers and projects in Malaysia.

To launch the new relationship, a breakfast half-day conference was held at the Boulevard Hotel on 2 June 2009 to review the unique technologies that Providence distributes in Asia, with focus on software from Marathon Technologies Corp. and Neverfail Group, the only purpose-designed packages for continuous computing and disaster prevention for servers regardless of the type of failure that occurs. Demonstration of various types of failures were performed on servers running live software, and attendees lingered through noon discussing applications, technical aspects, and deployment issues.

## **About Providence Solutions**

Providence is a major supplier of fault-tolerance and high availability technologies to defense, security, government and industry throughout Asia. Providence dedicate on providing the unique and innovative technologies through complete sales, consulting, training, implementation and technical support for customer.
